

PULL MORE POUNDS PER DOLLAR

We'll say it outright. US Synthetic Wire Die makes the longest-lasting polycrystalline diamond (PCD) wire dies in the business, which means you can muscle more pounds of wire per dollar spent on dies.

We're already the industry leader in diamond cutters used in drill bits for oil and gas exploration. Our technical expertise in PCD enabled development of the unique material used in our wire dies. In fact, in two stainless steel wire mills, US Synthetic dies lasted more than twice as long as other PCD dies.

Contact us to discuss how we can help you operate more efficiently using our dies.
